ABSTRACT

The Environmental Information Exchange Network and E-Enterprise for the Environment together represent an evolutionary process that's all about sharing environmental information and modernizing the business of environmental protection. In the future, these business models will work in a fully-integrated and seamless manner to support the efforts of all of the environmental co-regulators to provide healthier communities, and a healthier environment and economy.

E-Enterprise for the Environment

E-Enterprise for the Environment is a new model for collaborative leadership among environmental co-regulators, engaging with all interested and affected parties, to achieve positive environmental, human health, and economic outcomes.

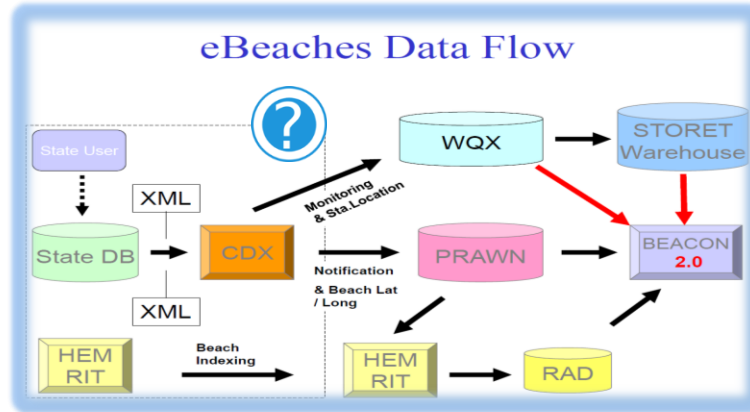

A Continuous Evolution
