2015 Exchange Network National Meeting

Supporting the Business of Environmental Protection

September 29-October 1, 2015 Sheraton Philadelphia Society Hill Hotel Philadelphia, Pennsylvania

http://www.exchangenetwork.net/en2015

ABSTRACT

EPA is requiring facilities using Part 60 & 61 Test Methods to report results electronically using the Electronic Reporting Tool (ERT) to submit to the Central Data Exchange (CDX). The EIEX solution provides a single point of access for facilities, regulatory agencies and data users to report, transfer, query, and share source test report emissions data created from the ERT. During this presentation, we will provide background on the project, discuss the EIEX solution, and detail next steps.

EIEX Project

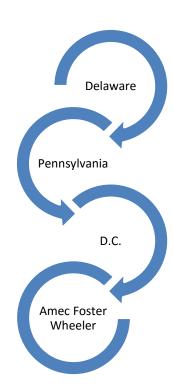

Presentation Agenda

- Background
- Our Solution
- Project Status
- Next Steps

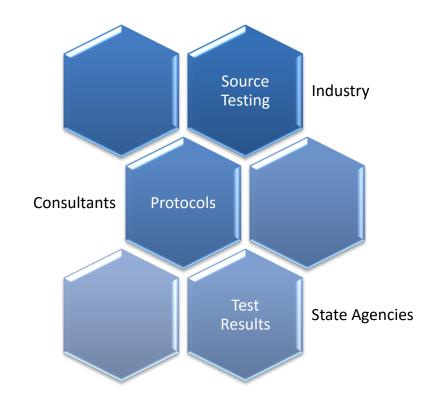

Who Are We?

What We Do

Determinations

Research

Opportunity

– Current State:

- Project partners information flow process of stack testing information:
 - Paper documents
 - PDFs, Excel spreadsheets, Word documents (e-mailing or very specific system to the agency, i.e. PSIMS).

– Future State:

 EPA is requiring Facilities using Part 60 & 61 Test Methods report results electronically using the Electronic Reporting Tool (ERT) to submit to the Central Data Exchange (CDX)

– Need:

 To provide a single point of access for facilities, regulatory agencies, and data users to report, transfer, query, and share source test report emissions data created from the ERT.

Electronic Reporting Tool (ERT)

 Electronically create and submit sampling test plans and reports to regulatory agencies

- Provide a means for regulatory agencies to give comments on a test plan after approval
- Calculate results
- Submit the test results to an electronic report to the regulatory agency

ERT

ERT Components

ERT Application

Microsoft Access
 Database

Project Data Set

PDS, Microsoft Access
 Database file
 generated by ERT
 application

Excel Spreadsheet

 Can be used as an option for entering manual test data into the ERT.

ERT PDS

Contains

Test Plan

Test Reviews

Test Report Data

Test Report Assessment

Exchange

Source test contractor

Facility

State Agency

EPA (CDX)

Delaware submitted a proposal to the Exchange Network and was awarded a grant to implement an electronic solution for source testing data

Needs

Single Point of Access to transfer information	
Versioning	
Query Data	
Track Metrics	
Automate Workflows	

EIEX Project

Phase 1: Business Case Analysis √ Phase 2: Solution Requirements Analysis √ Phase 3: Solution
Design and
Prototype √

Phase 4: Construct EIEX Solution √

Phase 5: Testing and Implementation √

Phase 6: Training

Phase 7: Post Implementation Support

Phase 8: Project Debriefing

EIEX Design Solution

Platform

- Amazon Cloud (Amazon Web Services)
 - A cost effective platform
 - Flexibility of resizable compute capacity
 - Backup capabilities
 - Site management tools.

Software

- Microsoft SharePoint 2013
 - Designed for document tracking projects
 - Lends itself to the primary EIEX functions.

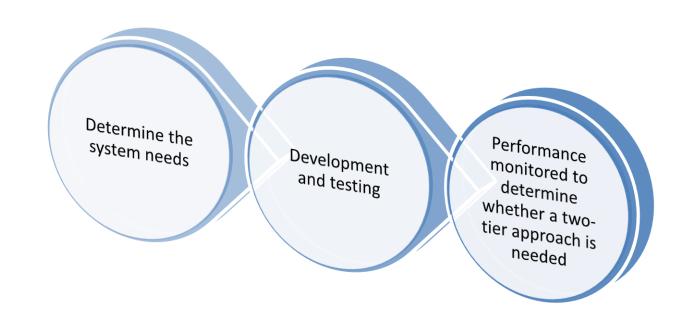

Hardware

- Single server Amazon
 Web Services EC2 server
 instance, Intel Xeon CPU ES 2670x2@2.49 GHz, 15.3 GB
 RAM, 32 GB SSD attached
 storage and Amazon Elastic
 Block Store(EBS) storage
 - Specification may be adjusted depending on requirements of the Agency.

Single Server

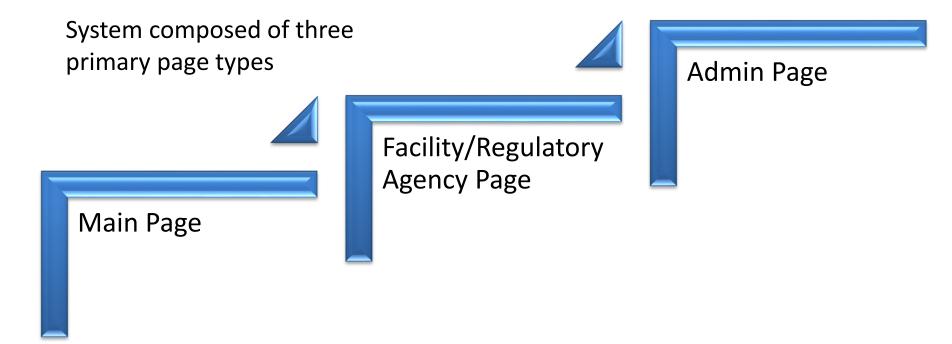

Measuring Performance

3 Sites

- Delaware Regulatory Agency Site
- District of Columbia Regulatory Agency Site
- Pennsylvania Regulatory Agency Site

EIEX: Next Steps

Item	Remark
Identify enhancements to base solution to assist project partners with easy transition to system.	PA and DC provided list of suggestions
Prioritize list of enhancements	
Add other agencies to solution	Communications with EPA
Complete Phases 7 & 8
